SUMMARY

Seeking valuable experience and aiming to gain in-depth knowledge in various areas of the IT industry. Highly motivated to pursue a challenging career with a progressive and innovative organization, where I can contribute effectively using my technical skills, creativity, and problem-solving abilities, particularly in the field of software development and any related field. Eager to grow professionally and continuously improve through hands-on projects, team collaboration, and adapting to new technologies in a dynamic work environment.

TECHNICAL SKILL

- Web Development Languages (HTML, CSS, Javascript, PHP)
- Mobile Application Development Language (Java-based, Flutter)
- Other Programming Languages (C++, C#, Java and Python)
- System Analysis (SDLC, DBLC)
- AI Development (Kalman Filter, Fuzzy Logic)
- 3D Designer (Tinkercad)
- IOT Build (Esp 8266, Esp 32)
- UI/UX Design (Figma, Canva, Adobe Illustrator, Adobe Photoshop)
- Macro VBA Programming (Excel)

SOFT SKILLS

- Proven leadership skills and ability to motivate.
- Ability to work independently.
- Highly organized and efficient.
- Self-motivated and quick to adapt to new environments.
- Rapid learner with strong problem-solving skills

EDUCATIONS

Bachelor of Computer Science In Software Development (Honours)

2023 - 2026

Universiti Teknikal Malaysia Melaka (UTeM)

- Achieved Dean's List for outstanding academic performance in First and Third Semester
- Developed Sihat Selalu App, a health monitoring application with user authentication and IoT integration
- Contributed to NutriGuardian, a system focused on nutrition tracking and health awareness
- Gained practical experience in software development, system design, and mobile application development

Diploma In Information and Communication Technology

2020 - 2023

Universiti Teknikal Malaysia Melaka (UTeM)

- Contributed to the development of a Food Ordering System as a Final Year Project
- Designed and implemented user interface for ordering and menu selection
- Assisted in database design for managing orders, customers, and transactions
- Collaborated in system testing and debugging to ensure functionality and usability

EXPERIENCE

Web Developer - Intern

Jun 2022 - Oct 2022

Delima Ain Enterprise

- Contributed to leading the development of the company website to support efficient raw material management.
- Assisted in promoting and designing commercial product concepts to enhance market appeal and brand value.

Perbadanan Pengurusan Rumah Pangsa Taman Tasik Utama

- Developed an Excel VBA macro system to manage historical records of maintenance fees, summons, and other payments
- Automated annual data updates, improving efficiency and reducing manual processing
- Assisted in filing and organizing records to ensure proper documentation and accessibility
- Supported audit processes by verifying and reviewing historical financial records
- Designed and developed the official company website to enhance digital presence and information access

PROJECT

• **Smart Food Ordering System with Real-Time Menu Management**

Personal Project | PHP, MySQL, HTML, CSS, JavaScript

- Developed a smart food ordering system with real-time menu management for efficient order processing and customer experience.
- Implemented dynamic menu updates, allowing administrators to modify food items, prices, and availability instantly.
- Designed a user-friendly interface for customers to browse menus and place orders seamlessly.
- Integrated database management for storing orders, menu details, and customer information securely.
- Improved restaurant operation efficiency by reducing manual order handling and minimising ordering errors.

• **JomWayang: Interactive Cinema Booking and Seat Management System**

Personal Project | PHP, MySQL, HTML, CSS, JavaScript

- Developed an interactive cinema booking and seat management system to simplify ticket reservations and enhance user experience.
- Implemented real-time seat selection and availability updates for accurate booking management.
- Designed a responsive and user-friendly interface for movie browsing, seat selection, and online booking.
- Integrated database functionality to manage movie schedules, customer bookings, and payment records efficiently.
- Improved booking accuracy and operational efficiency by reducing manual reservation processes and seat conflicts.

• **NutriGuardian: Smart Nutrition Tracking Application (AI-Powered Insights & IoT Integration)**

FYP Project | Flutter, PHP, IoT Integration, API Integration, AI Intergration

- Developed a smart nutrition tracking application with AI-powered insights and IoT integration to support healthy lifestyle management.
- Implemented AI features to analyze dietary habits and provide personalized nutrition recommendations.
- Integrated IoT devices for real-time health and nutrition data monitoring.
- Designed a user-friendly interface for tracking meals, calorie intake, and health progress efficiently.
- Utilized database management to securely store user health records, nutrition data, and activity history.

CERTIFICATE

Python Programming Fundamentals

2025

- Data Science Associate

- Completed training in Python programming fundamentals including variables, functions, loops, data structures, and problem-solving techniques.
- Developed foundational coding and logical thinking skills through practical exercises and hands-on programming projects.

Oracle Certified Foundations Associate

2025

- Oracle Academy

- Gained foundational knowledge in database especially in Barker Notation, database programming concepts, and Oracle technologies.
- Developed understanding of data management, problem-solving, and fundamental IT concepts through practical learning activities.

ARCHIVEMENT

• **Group Leader in Workshop 2 (2024-2025)**

- Leading team tasks, coordinating project development, and ensuring timely completion
- Demonstrated strong leadership, teamwork, and communication skills.

• **Group Leader for the Final year project in Diploma (2022-2023)**

- Contribute in designing and developing the system.
- Showcased strong leadership and technical skills.

• **GDSC Code Battle (2024) - Third Place**

- Demonstrating strong problem-solving, coding skills and the ability to perform under pressure in a competitive environment.
